DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain <u>a</u> patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1 and 2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of prior U.S. Patent No. 6,411,904. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Auer et al. (US Patent No. 5,367,474).

With regard to a buffer having a plurality of data storage areas that store data collected by a flow analyzer and store data from a previous sample period and that include an addressable range of storage areas, as shown in claims 3 and 5, Auer et al. teach a flow cytometer that includes seven analog signal processors that store data in

two sample and hold circuits so that data that act as a buffer between detectors and a CPU that further processes data acquired (col. 5, lines 16-64; col. 6, lines 32-44; Fig. 2, analog signal processors 48, 50, 52, 54, 56, 58, 60, CPU 62). With regard to at least one processor being connected to the buffer to receive data reading data previously stored from an even with substantially zero dead time, as shown in claims 3 and 5, Auer et al. teach transferring data from one sample and hold circuit while data is being read into the other sample and hold circuit (col. 12, lines 26-52).

Page 3

With regard to a flow cytometer, as shown in claims 4 and 6, Auer teach a flow cytometer (Title).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel L. Barbee whose telephone number is 571-272-2212. The examiner can normally be reached on Monday-Friday from 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on 571-272-2216. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
